FLUXX[®] Degassing Inserts

Maximum airflow rate

Description	Item number	Typical airflow at 12 mbar	Typical WEP ¹
F38	924 025	72 L/h	0.8 bar
	924 026 – LOCK		
	924 036 – LOCK SN		
F38 HF	924 065	139 L/h	0.4 bar
	924 066 – LOCK		
	924 033 – LOCK SN		
F38 EHF	924 067	225 L/h	0.3 bar
	924 068 – LOCK		
	924 034 – LOCK SN		

¹ WEP = Water Entry Pressure

You need a venting solution with ultra-high airflow?

The search is over – We have the appropriate products for you!

Our two new FLUXX[®] products – the F38 HF (**H**igh-**F**low) and F38 EHF (**E**xtr^em^e **H**igh-**F**low) – are guaranteed to impress with ultra-high airflow performance.

These product solutions enable the optimal venting of various containers in heavy pressure situations with highly outgassing substances.

Both products are available as press-in and snap-fit (LOCK) versions with long neck as well as shortened neck (SN). They also comply to food industry standards.

We look forward to your inquiry and will support you in translating economic benefits of our FLUXX[®] product portfolio to your field of application!
