FLUXX® Screw Caps r-KS 51 & 61 as contribution to the circular economy

We have launched our **Screw Caps DIN 51 & 61 as r-version that is produced of 50% recycled material** – without visible differences to the standard product!

These r-KS Screw Caps also have a high material stability, due to the fact that used **PCR (Post-Consumer-Recyclate)** is exclusively from recycled HDPE closures. In addition, the r-KS maintain our high-quality design with a glossy finish in black color*. All of our Screw Caps deliver a molded-on tamper-evident ring and an EPE seal.

Discover the new r-version from our KS series!

* Other colors upon request.
